About Me

Enthusiastic and detail-oriented Junior Web Developer with hands-on experience in building responsive, user-friendly websites and web applications. Skilled in front-end technologies including HTML, CSS, JavaScript, and React, with a growing knowledge of back-end tools like Node.js and Socket.io. Currently pursuing professional training at NexSkills Institute, and have completed projects including an e-commerce site, a GitHub clone, and a real-time chat app. Passionate about writing clean, efficient code and continuously learning new technologies. Strong team collaborator with a desire to contribute to impactful digital solutions and grow as a full-stack developer.

WORK EXPERIENCE

Personal Projects Self-Initiated

Cultural Delights – E-commerce Website

- Frontend Developer | React, CSS
- Built a responsive e-commerce platform for dried fruits and traditional attire.
- Implemented product carousels, quantity and size selectors, and a related products section.

Service Booking App (In Progress)

- Frontend Developer | React, CSS Modules
- Developing a web app where users can post and book services based on categories and schedules.
- Includes calendar selection, category filtering, and booking request features.

Multi-Step Task Posting Form

- Frontend Developer | React, Bootstrap
- Created a task scheduling form with flexible date input and step-by-step navigation.
- Backend form data handling will be added in the final phase using Node.js and MongoDB.
